Yashu Shukla

AI Research Engineer

Seoul | +82-21778965 | yashushukla2014@gmail.com | Homepage: https://ys2064.github.io/Yashu_Shukla/

ABOUT ME

AI Research Engineer with hands-on experience across machine learning, computer vision, NLP, and multimodal AI, building and deploying systems in both research and industry settings. Currently developing Vision-Language-Action and robot foundation models for dexterous humanoid manipulation at RLWRLD. Driven to bridge AI research and real-world impact, with a long-term focus on Physical AI.

EXPERIENCE

AI Research Engineer Intern: RLWRLD, Seoul **Dec 2025 - Present**

- Curated robotic manipulation datasets in Isaac Sim that matched model accuracy with **50% less data**, benchmarked VLA models, and built an automated training/evaluation pipeline on Slurm and Kubernetes GPU clusters, cutting setup time from 20-30 min to **under 30 s**
- Developed simulated **tactile** and **joint-torque** sensing in **MuJoCo** and integrated 3D geometry perception into VLA models via foundation-model scene understanding, fusing touch and torque signals for **touch-aware** dexterous manipulation policies

Data Scientist Intern: w3company, Seoul **Mar 2025 - Dec 2025**

- **R&D** on an ML multi-module fake-account and anomaly detection system (**patent filed**); built ResNet classifiers to detect AI-generated profile photos
- Developed **BERT**-based sentiment and text classification models for the social app Moji, producing user-engagement insights

Undergraduate Thesis Researcher: Hanyang University **Mar 2025 - Dec 2025**

Advisor: Prof. Noh Youngtae, Department of Data Science

- Developed a CNN+BiLSTM+Attention model for contactless **vital-sign estimation** from **mmWave** radar, achieving **3× improvement** over classical baselines

Teaching Assistant: Hanyang University, Seoul **Sep 2024 - Dec 2024**

- Managed a class of 30+ students, facilitating discussions and class activities

Software Engineer Intern: Bespoke System Pvt. Ltd., India **Jul 2024 - Aug 2024**

- Developed **full-stack** web applications using ASP.NET, Angular, and MS SQL Server

PUBLICATIONS

PointWAM: 3D World Action Modeling for Dexterous Robotic Manipulation | ICLR 2027 (under review) **Oct 2026**

RLDX-1 Technical Report | Published in arXiv **May 2026**

Cerebellum Activation in Depression | Poster, Korean Society for Brain and Neural Sciences (KSBNS) **Aug 2025**

PROJECTS

StressMate: Mental Wellness Web App: Built a Django app integrating LLMs with RAG, deployed on AWS EC2 and S3 **May 2025 - Jun 2025**

PlateCheck Application: Built a Korean food ingredient recognition app combining a fine-tuned ResNet with GPT-4o Mini, evaluated through an HCI user study **Oct 2024 - Dec 2024**

Food Demand Forecasting using Temporal Convolutional Networks: Built a TCN time-series model to forecast food demand from historical sales data **Oct 2024 - Dec 2024**

News Audio Summarizer using BART: Built an end-to-end pipeline from news data collection and preprocessing to BART fine-tuning for audio news summarization **Apr 2024 - Jun 2024**

Sign Language Recognition Model with MLP and CNN: Developed a gesture recognition model using MLP and CNN architectures **Nov 2023**

EDUCATION

B.E. in Data Science: Hanyang University, Seoul **2022 - 2026**

Major: Data Science Engineering and Physiological Brain Science · **GPA 4.0 / 4.5**

AWARDS & LANGUAGES

- Excellence Award, Hanyang College of Engineering (2026)
- Hanyang Brain Academic Excellence Scholarship (2025-2026)
- Daewoong Foundation Global Scholarship (2025-2026)
- Special Scholarship for Academic Encouragement (2024)
- **Languages:** Native: English, Hindi · Intermediate: Gujarati · Beginner: Korean
